NOTE 1 – NATURE OF OPERATIONS AND SUMMARY OF SIGNIFICANT ACCOUNTING AND REPORTING POLICIES

Nature of Operations

Propanc Biopharma, Inc. (the “Company,” “we,” “us” or “our”) is based in Camberwell, Victoria Australia. Since its inception, substantially all of the operations of the Company have been focused on the development of new cancer treatments targeting high-risk patients, particularly cancer survivors, who need a follow-up, non-toxic, long-term therapy designed to prevent the cancer from returning and spreading. The Company anticipates establishing global markets for its technologies. Our lead product candidate, which we refer to as PRP, is an enhanced pro-enzyme formulation designed to enhance the anti-cancer effects of multiple enzymes acting synergistically. It is currently in the preclinical phase of development.

The Company was originally formed in Melbourne, Victoria, Australia on October 15, 2007 as Propanc PTY LTD. On November 23, 2010, Propanc Health Group Corporation was incorporated in the State of Delaware, and in January 2011, to reorganize the Company, all of the outstanding shares of Propanc PTY LTD were acquired on a one-for-one basis by Propanc Health Group Corporation, with Propanc PTY LTD becoming a wholly-owned subsidiary of the Company.

On July 22, 2016, the Company formed another wholly-owned subsidiary, Propanc (UK) Limited under the laws of England and Wales for the purpose of submitting an orphan drug application to the European Medicines Agency as a small and medium-sized enterprise. As of March 31, 2023, there has been no activity within this entity.

Effective April 20, 2017, the Company changed its name to “Propanc Biopharma, Inc.” to reflect the Company’s stage of operations and development better.

In July 2020, a world-first patent was granted in Australia for the cancer treatment method patent family. Presently, there are 59 granted, allowed, or accepted patents and 17 patents filed, or under examination in key global jurisdictions relating to the use of proenzymes against solid tumors, covering the lead product candidate PRP.

The Company hopes to capture and protect additional patentable subject matter based on the Company’s field of technology relating to pharmaceutical compositions of proenzymes for treating cancer by filing additional patent applications as it advances its lead product candidate, PRP, through various stages of development.

Basis of Presentation

The Company’s interim unaudited condensed consolidated financial statements included in this Quarterly Report on Form 10-Q (this “Quarterly Report”) have been prepared in accordance with accounting principles generally accepted in the United States of America (“US GAAP”) and pursuant to the rules and regulations of the U.S. Securities and Exchange Commission (the “SEC”). In the opinion of the Company’s management, all adjustments (consisting of normal recurring adjustments and reclassifications and non-recurring adjustments) necessary to present fairly our consolidated results of operations for the three and nine months ended March 31, 2023 and 2022 and cash flows for the three and nine months ended March 31, 2023 and 2022, and our consolidated financial position at March 31, 2023 have been made. The Company’s results of operations for the nine months ended March 31, 2023 are not necessarily indicative of the operating results to be expected for the full fiscal year ending June 30, 2023.

Certain information and disclosures normally included in the notes to the Company’s annual audited consolidated financial statements have been condensed or omitted from the Company’s interim unaudited condensed consolidated financial statements included in this Quarterly Report. Accordingly, these interim unaudited condensed consolidated financial statements should be read in conjunction with the Company’s audited consolidated financial statements and notes thereto for the fiscal year ended June 30, 2022. The June 30, 2022 balance sheet is derived from those statements.

Principles of Consolidation

The unaudited condensed consolidated financial statements include the accounts of Propanc Biopharma, Inc., the parent entity, and its wholly-owned subsidiary, Propanc PTY LTD. All intercompany balances and transactions have been eliminated in consolidation. Propanc (UK) Limited was an inactive wholly-owned subsidiary through March 31, 2023.

Use of Estimates

The preparation of financial statements in conformity with US GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the consolidated financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from these estimates. Significant estimates in the accompanying consolidated financial statements include the estimates of useful lives for depreciation, valuation of the operating lease liability and related right-of-use asset, valuation of derivatives, allowance for uncollectable receivables, valuation of equity based instruments issued for other than cash, the valuation allowance on deferred tax assets and foreign currency translation due to certain average exchange rates applied in lieu of spot rates on transaction dates.

Foreign Currency Translation and Other Comprehensive Income (Loss)

The Company's wholly-owned subsidiary's functional currency is the Australian dollar (AUD). For financial reporting purposes, the Australian dollar has been translated into the Company's reporting currency, which is the United States dollar (\$) and/or (USD). Assets and liabilities are translated at the exchange rate in effect at the balance sheet date. Revenues and expenses are translated at the average rate of exchange prevailing during the reporting period. Equity transactions are translated at each historical transaction date spot rate. Translation adjustments arising from the use of different exchange rates from period to period are included as a component of stockholders' equity (deficit) as "Accumulated other comprehensive income (loss)." Gains and losses resulting from foreign currency transactions are included in the statements of operations and comprehensive income (loss) as a component of other comprehensive income (loss). There have been no significant fluctuations in the exchange rate for the conversion of Australian dollars to USD after the balance sheet date.

Other Comprehensive Income (Loss) for all periods presented includes only foreign currency translation gains (losses).

Assets and liabilities denominated in foreign currencies are translated into the functional currency at the exchange rates prevailing at the consolidated balance sheet date with any transaction gains and losses that arise from exchange rate fluctuations on transactions denominated in a currency other than the functional currency included in the consolidated results of operations as incurred. Effective fiscal year 2021, the parent company determined that the intercompany loans will not be repaid in the foreseeable future and thus, per ASC 830-20-35-3, gains and losses from measuring the intercompany balances are recorded within cumulative translation adjustment, a component of accumulated other comprehensive income (loss). Prior to July 1, 2020, the Company recorded the foreign currency transaction gains and losses from measuring the intercompany balances as a component of other income (expenses) titled foreign currency transaction gain (loss). As of March 31, 2023 and 2022, the Company recognized a cumulative exchange gain (loss) of approximately \$556,000 and \$15,600, respectively, on intercompany loans made by the parent to the subsidiary that have not been repaid as of March 31, 2023, which is included as component of accumulated other comprehensive income on the accompanying unaudited condensed consolidated balance sheet.

As of March 31, 2023 and June 30, 2022, the exchange rates used to translate amounts in Australian dollars into USD for the purposes of preparing the consolidated financial statements were as follows:

	March 31, 2023	June 30, 2022
Exchange rate on balance sheet dates		
USD : AUD exchange rate	0.6697	0.6915
Average exchange rate for the period		
USD : AUD exchange rate	0.6794	0.7253

The change in Accumulated Other Comprehensive Income by component during the nine months ended March 31, 2023 was as follows:

	Foreign Currency Items:
Balance, June 30, 2022	\$ 1,234,549
Unrealized foreign currency translation gain	59,198
Ending balance, March 31, 2023	\$ 1,293,747

Fair Value of Financial Instruments and Fair Value Measurements

The Company measures its financial assets and liabilities in accordance with US GAAP. For certain financial instruments, including cash and cash equivalents, receivables, accounts payable and accrued liabilities, the carrying amounts approximate fair value due to their short maturities. Amounts recorded for notes payable, net of discount, and loans payable also approximate fair value because current interest rates available for debt with similar terms and maturities are substantially the same.

The Company follows accounting guidance for financial assets and liabilities. This standard defines fair value, provides guidance for measuring fair value and requires certain disclosures. This standard does not require any new fair value measurements, but rather applies to all other accounting pronouncements that require or permit fair value measurements. This guidance does not apply to measurements related to share-based payments. This guidance discusses valuation techniques, such as the market approach (comparable market prices), the income approach (present value of future income or cash flow), and the cost approach (cost to replace the service capacity of an asset or replacement cost).

PROPANC BIOPHARMA, INC. AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
March 31, 2023
(Unaudited)

The guidance utilizes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value into three broad levels. The following is a brief description of those three levels:

Level 1: Observable inputs such as quoted prices (unadjusted) in active markets for identical assets or liabilities.

Level 2: Inputs, other than quoted prices that are observable, either directly or indirectly. These include quoted prices for similar assets or liabilities in active markets and quoted prices for identical or similar assets or liabilities in markets that are not active.

Level 3: Unobservable inputs in which little or no market data exists, therefore developed using estimates and assumptions developed by us, which reflect those that a market participant would use.

Also see Note 11 – Derivative Financial Instruments and Fair Value Measurements.

Cash and Cash Equivalents

Cash and cash equivalents include cash on hand and at banks, short-term deposits with an original maturity of three months or less with financial institutions, and bank overdrafts. Bank overdrafts are reflected as a current liability on the balance sheets. There were no cash equivalents as of March 31, 2023 or June 30, 2022.

Property and Equipment

Property and equipment are stated at cost, net of accumulated depreciation. Expenditures for maintenance and repairs are expensed as incurred; additions, renewals, and betterments are capitalized. When property and equipment are retired or otherwise disposed of, the related cost and accumulated depreciation are removed from the respective accounts, and any gain or loss is included in operations. Depreciation of property and equipment is provided using the declining balance method. The depreciable amount is the cost less its residual value.

The estimated useful lives are as follows:

Machinery and equipment	- 5 years
Furniture	- 7 years

Patents

Patents are stated at cost and amortized on a straight-line basis over the estimated future periods if and once the patent has been granted by a regulatory agency. However, the Company will expense any patent costs as long as it is in the startup stage. Accordingly, as the Company's products are not currently approved for market, all patent costs incurred from 2013 through March 31, 2023 were expensed immediately. This practice of expensing patent costs immediately ends when a product receives market authorization from a government regulatory agency.

Impairment of Long-Lived Assets

In accordance with ASC 360-10, "Long-lived assets," which include property and equipment and intangible assets, are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. Recoverability of long-lived assets to be held and used is measured by a comparison of the carrying amount of an asset to the estimated undiscounted future cash flows expected to be generated by the asset. If the carrying amount of an asset exceeds its estimated undiscounted future cash flows, an impairment charge is recognized by the amount by which the carrying amount of the asset exceeds the fair value of the assets. Fair value is generally determined using the asset's expected future discounted cash flows or market value, if readily determinable.

Employee Benefit Liability

Liabilities arising in respect of wages and salaries, accumulated annual leave, accumulated long service leave and any other employee benefits expected to be settled within twelve months of the reporting date are measured based on the employee's remuneration rates applicable at the reporting date. All other employee benefit liabilities are measured at the present value of the estimated future cash outflow to be made in respect of services provided by employees up to the reporting date. All employee liabilities are owed within the next twelve months.

Australian Goods and Services Tax ("GST")

Revenues, expenses and balance sheet items are recognized net of the amount of GST, except payable and receivable balances which are shown inclusive of GST. The GST incurred is payable on revenues to, and recoverable on purchases from, the Australian Taxation Office.

Cash flows are presented in the statements of cash flow on a gross basis, except for the GST component of investing and financing activities, which are disclosed as operating cash flows.

As of March 31, 2023, and June 30, 2022, the Company was owed \$3,334 and \$2,342, respectively, from the Australian Taxation Office. These amounts were fully collected subsequent to the balance sheet reporting dates.

Derivative Instruments

ASC Topic 815, *Derivatives and Hedging* (“ASC Topic 815”), establishes accounting and reporting standards for derivative instruments and for hedging activities by requiring that all derivatives be recognized in the balance sheet and measured at fair value. Gains or losses resulting from changes in the fair value of derivatives are recognized in earnings. On the date of conversion or payoff of debt, the Company records the fair value of the conversion shares, removes the fair value of the related derivative liability, removes any discounts and records a net gain or loss on debt extinguishment.

Convertible Notes With Variable Conversion Options

The Company has entered into convertible notes, some of which contain variable conversion options, whereby the outstanding principal and accrued interest may be converted, by the holder, into shares of the Company’s common stock, par value \$0.001 per share (“common stock”) at a fixed discount to the price of the common stock at or around the time of conversion. The Company treats these convertible notes as stock settled debt under ASC 480, *“Distinguishing Liabilities from Equity”* and measures the fair value of the notes at the time of issuance, which is the result of the share price discount at the time of conversion and records the put premium as interest expense.

Income Taxes

The Company is governed by Australia and United States income tax laws, which are administered by the Australian Taxation Office and the United States Internal Revenue Service, respectively. The Company follows ASC 740 *“Accounting for Income Taxes,”* when accounting for income taxes, which requires an asset and liability approach to financial accounting and reporting for income taxes. Deferred income tax assets and liabilities are computed annually for temporary differences between the financial statements and tax bases of assets and liabilities that will result in taxable or deductible amounts in the future based on enacted tax laws and rates applicable to the periods in which the differences are expected to affect taxable income. Valuation allowances are established when necessary to reduce deferred tax assets to the amount expected to be realized. Income tax expense is the tax payable or refundable for the period plus or minus the change during the period in deferred tax assets and liabilities.

The Company follows ASC 740, Sections 25 through 60, *“Accounting for Uncertainty in Income Taxes.”* These sections provide detailed guidance for the financial statement recognition, measurement and disclosure of uncertain tax positions recognized in the financial statements. Tax positions must meet a “more-likely-than-not” recognition threshold at the effective date to be recognized upon the adoption of ASC 740 and in subsequent periods.

Research and Development Costs and Tax Credits

In accordance with ASC 730-10, *“Research and Development-Overall,”* research and development costs are expensed when incurred. Total research and development costs for the three months ended March 31, 2023 and 2022 were \$66,020 and \$50,395, respectively. Total research and development costs for the nine months ended March 31, 2023 and 2022 were \$242,223 and \$147,702, respectively. Research and development costs include allocations of salary among certain officers.

The Company may apply for research and development tax concessions with the Australian Taxation Office on an annual basis. Although the amount is possible to estimate at year end, the Australian Taxation Office may reject or materially alter the claim amount. Accordingly, the Company does not recognize the benefit of the claim amount until cash receipt since collectability is not certain until such time. The tax concession is a refundable credit. If the Company has net income, then the Company can receive the credit which reduces its income tax liability. If the Company has net losses, then the Company may still receive a cash payment for the credit, however, the Company’s net operating loss carryforwards are reduced by the gross equivalent loss that would produce the credit amount when the income tax rate is applied to that gross amount. The concession is recognized as tax benefit, in operations, upon receipt.

During each of the nine months ended March 31, 2023 and 2022, the Company applied for, and received from the Australian Taxation Office, a research and development tax credit in the amount of \$131,037 and \$55,250, respectively, which is reflected as a tax benefit in the accompanying unaudited condensed consolidated statements of operations and comprehensive income (loss).

Stock Based Compensation

The Company records stock-based compensation in accordance with ASC 718, *“Stock Compensation”*. ASC 718 requires the fair value of all stock-based employee compensation awarded to employees to be recorded as an expense over the shorter of the service period or the vesting period. The Company values employee and non-employee stock-based compensation at fair value using the Black-Scholes Option Pricing Model.

The Company adopted ASU 2018-07 and accounts for non-employee share-based awards in accordance with the measurement and recognition criteria of ASC 718 and recognizes the fair value of such awards over the service period. The Company used the modified prospective method of adoption.

Revenue Recognition

The Company applies ASC Topic 606, Revenue from Contracts with Customers (“ASC 606”). ASC 606 establishes a single comprehensive model for entities to use in accounting for revenue arising from contracts with customers and supersedes most of the existing revenue recognition guidance. This standard requires an entity to recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services and also requires certain additional disclosures. Subject to these criteria, the Company intends to recognize revenue relating to royalties on product sales in the period in which the sale occurs and the royalty term has begun.

(Unaudited)

Legal Expenses

All legal costs for litigation are charged to expense as incurred.

Leases

The Company follows ASC Topic 842, Leases (Topic 842) and applies the package of practical expedients, which permit it not to reassess under the new standard its prior conclusions about lease identification, lease classification and initial direct costs. In addition, the Company elected not to apply ASC Topic 842 to arrangements with lease terms of 12 months or less. Operating lease right of use assets (“ROU”) represents the right to use the leased asset for the lease term and operating lease liabilities are recognized based on the present value of future minimum lease payments over the lease term at commencement date. As most leases do not provide an implicit rate, the Company uses an incremental borrowing rate based on the information available at the adoption date in determining the present value of future payments. Lease expense for minimum lease payments is amortized on a straight-line basis over the lease term and is included in general and administrative expenses.

Reclassifications

Certain prior period amounts have been reclassified to conform to the current period presentation. The reclassified amounts have no impact on the Company’s previously reported financial position or results of operations and relate to the presentation of accrued interest separately on the consolidated balance sheet, of which \$57,822 was previously included in convertible notes, net of discounts and including premiums at June 30, 2022.

Basic and Diluted Net Loss Per Share of Common Stock

Basic net loss per share of common stock is computed by dividing the net loss by the weighted average number of common stock outstanding during the period. Diluted net loss per common share is computed by dividing the net loss by the weighted average number of common shares outstanding for the period and, if dilutive, potential common shares outstanding during the period. Potentially dilutive securities consist of the incremental common shares issuable upon exercise of common stock equivalents such as stock options, warrants, restricted stock units and convertible debt instruments. Potentially dilutive securities are excluded from the computation if their effect is anti-dilutive. As a result, the basic and diluted per-share amounts for all periods presented are identical. Each holder of the notes and warrants has agreed to a 4.99% beneficial ownership conversion limitation (subject to certain noteholders’ abilities to increase such limitation to 9.99% upon 60 days’ notice to the Company), and certain notes may not be converted during the certain specified time period from the date of issuance. The Company’s CEO holds Series B Preferred Stock that, when combined, confers upon him a majority vote, including regarding authorization of additional common shares and/or the authorization of a reverse split the stock as considered necessary. Such securities are considered dilutive securities, which were excluded from the computation since the effect is anti-dilutive.

Recent Accounting Pronouncements

We have reviewed the Financial Accounting Standards Board (the “FASB”) issued Accounting Standards Update (“ASU”) accounting pronouncements and interpretations thereof that have effectiveness dates during the periods reported and in future periods. We have carefully considered the new pronouncements that alter previous generally accepted accounting principles and do not believe that any new or modified principles will have a material impact on the Company’s reported financial position or operations in the near term. The applicability of any standard is subject to the formal review of the Company’s financial management.

In August 2020, the FASB issued Accounting Standards Update (“ASU”) 2020-06, Debt – Debt with Conversion and Other Options (Subtopic 470-20) and Derivatives and Hedging Contracts in Entity’s Own Equity (Subtopic 815-40), which eliminates the beneficial conversion and cash conversion accounting models for convertible instruments, amends the accounting for certain contracts in an entity’s own equity that are currently accounted for as derivatives because of specific settlement provisions, and modifies how particular convertible instruments and certain contracts that may be settled in cash or shares impact the diluted EPS calculation. The standard is effective for annual periods beginning after December 15, 2023 for smaller reporting companies, and interim periods within those reporting periods. Early adoption is permitted, but no earlier than fiscal years beginning after December 15, 2020, including interim periods within those reporting periods. The Company is currently assessing the impact the new guidance will have on its condensed consolidated financial statements.

NOTE 2 – GOING CONCERN

The accompanying unaudited condensed consolidated financial statements have been prepared in conformity with US GAAP, which contemplate continuation of the Company as a going concern. For the nine months ended March 31, 2023, the Company had no revenues, had a net loss of \$1,912,522, and had net cash used in operations of \$927,278. Additionally, As of March 31, 2023, the Company had a working capital deficit, stockholders' deficit and accumulated deficit of \$2,963,642, \$2,941,414, and \$63,878,972, respectively. It is management's opinion that these conditions raise substantial doubt about the Company's ability to continue as a going concern for a period of at least twelve months from the issue date of this Quarterly Report.

The unaudited condensed consolidated financial statements do not include any adjustments to reflect the possible future effect on the recoverability and classification of assets or the amounts and classifications of liabilities that may result from the outcome of this uncertainty.

Successful completion of the Company's development program and, ultimately, the attainment of profitable operations are dependent upon future events, including obtaining adequate financing to fulfill its development activities, acceptance of the Company's patent applications, obtaining additional sources of suitable and adequate financing and ultimately achieving a level of sales adequate to support the Company's cost structure and business plan. The Company's ability to continue as a going concern is also dependent on its ability to further develop and execute on its business plan. However, there can be no assurances that any or all of these endeavors will be successful.

In March 2020, the outbreak of COVID-19 (coronavirus) caused by a novel strain of the coronavirus was recognized as a pandemic by the World Health Organization, and the outbreak has become increasingly widespread in the United States, Europe and Australia, including in each of the areas in which the Company operates. The COVID-19 (coronavirus) outbreak has had a notable impact on general economic conditions, including but not limited to the temporary closures of many businesses, "shelter-in-place" and other governmental regulations, reduced business and consumer spending due to both job losses, reduced investing activity and M&A transactions, among many other effects attributable to the COVID-19 (coronavirus). While to date the Company has not been required to stop operating, management is evaluating its use of its office space, virtual meetings and the like.

NOTE 3 – PROPERTY AND EQUIPMENT

NOTE 4 – DUE TO FORMER DIRECTOR – RELATED PARTY

Due to former director – related party represents unsecured advances made primarily by a former director for operating expenses on behalf of the Company, such as intellectual property and formation expenses. The expenses were paid for on behalf of the Company and are due upon demand. The Company is currently not being charged interest under these advances. The total amounts owed to the former director at March 31, 2023 and June 30, 2022 were \$29,777 and \$30,746, respectively. The Company plans to repay the advances as its cash resources allow (see Note 9).

Crown Bridge Securities Purchase Agreement

Effective October 3, 2019, the Company entered into a securities purchase agreement with Crown Bridge Partners, LLC (“Crown Bridge”), pursuant to which Crown Bridge purchased a convertible promissory note from the Company (the “Crown Bridge Note”), which had a remaining principal balance of \$65,280 as of March 31, 2023 (see Note 6). The maturity date of the Crown Bridge Note was October 3, 2020 and is currently past due. The Crown Bridge Note bore interest at a default interest rate of 15% per annum. In August 2022, the SEC filed a complaint against Crown Bridge due to its violation of Section 15(a)(1) of the Securities Exchange Act of 1934, as amended (the “Exchange Act”). Crown Bridge agreed to surrender all conversion rights in its currently held convertible notes, including the Crown Bridge Note. Consequently, as of March 31, 2023, the Company reclassified the remaining principal balance of \$65,280 from a convertible note into a loan payable. Additionally, the Company recorded the remaining put premium of \$43,520 into gain on extinguishment of debt during the nine months ended March 31, 2023. Coventry Enterprises, LLC Securities Purchase Agreement

On November 3, 2022, the Company entered into a Securities Purchase Agreement with Coventry Enterprises, LLC (“Coventry”), pursuant to which the Company issued Coventry a promissory note from the Company in the aggregate principal amount of \$125,000, such principal and the interest thereon convertible into shares of the Company’s common stock following an event of default (the “Coventry Note”). The Coventry Note contains a \$25,000 original issue discount. The Company used the net proceeds of \$100,000 from the Coventry Note for general working capital purposes.

The Coventry Note bears interest at a rate of 10% per annum, with \$12,500 in guaranteed interest. The principal amount and the guaranteed interest is due and payable in seven equal monthly payments of \$19,643, commencing on March 24, 2023 and continuing on the 24th day of each month thereafter until paid in full not later than October 24, 2023, or such earlier date as the Coventry Note is required or permitted to be repaid and to pay such other interest to Coventry on the aggregate unconverted and then-outstanding principal amount of the Coventry Note in accordance with the provisions thereof. Any or all of the principal amount and guaranteed interest may be pre-paid at any time and from time to time, in each case without penalty or premium.

Additionally, in the event that the Company files with the SEC a qualified offering statement on Form 1-A and such note has been outstanding for four months since its issuance, Coventry has the right to convert all or portion of such note, including guaranteed interest, into shares of common stock at the offering price used in connection with such offering.

At any time following an event of default under the Coventry Note, it becomes convertible, in whole or in part, into shares of Common Stock at the option of Coventry, at any time and from time to time thereafter (subject to the beneficial ownership limitations set forth therein). The conversion price of the Coventry Note is ninety percent (90%) per share of the lowest per-share VWAP during the twenty (20) trading-day period before the conversion (each, a “Calculated Conversion Price”). In the event that, within 30 calendar days either before or after any conversion, the conversion price of which is based upon a Calculated Conversion Price, the Company consummates (in whole or in part) any financing (whether such financing is equity, equity-equivalent, or debt or any combination thereof) or for any other reason issues any shares of common stock or any common stock equivalents at a price less than the most recent Calculated Conversion Price (the “Alternative Conversion Price”), regardless of when that note or instrument was originated, then, at the option of Coventry, (i) if the conversion has not yet occurred, then the Alternative Conversion Price will be substituted for the Calculated Conversion Price and (ii) if the conversion has occurred, then, within two trading days following Coventry’s written request, the Company is required to issue to Coventry that number of shares of Common Stock equivalent to the difference between the number of shares of Common Stock that had been issued using the Calculated Conversion Price and the number of shares of Common Stock that would have been issued using the Alternative Conversion Price. Accordingly, the Coventry note is treated as stock settled debt under ASC 480 and the Company recorded a total of \$13,889 put premium during the nine months ended March 31, 2023.

Upon the occurrence and during the continuation of certain events of default, interest on the Coventry Note accrues at a default interest rate equal to the lesser of (i) 18% per annum or (ii) the maximum rate permitted by law. Subject to the beneficial ownership limitation in the Coventry Note, if any event of default occurs, then the outstanding principal amount guaranteed interest plus accrued but unpaid default rate interest, liquidated damages and other amounts owing on the Coventry Note through the date of acceleration becomes immediately due and payable at Coventry’s option, in cash or in shares of common stock at the mandatory default amount, which is equal to 120% of all such amounts due on the Coventry Note. If the Company fails to deliver to Coventry such shares, the Company is required to pay in cash an amount equal to the amount that the value of such shares exceeds the principal amount and interest of the attempted conversion.

As an additional inducement to Coventry entering into such agreement, the Company issued to Coventry 75,000,000 shares of common stock on the issuance date of the Coventry Note, which was valued using the relative fair value method at \$37,500 and recognized as debt discount to be amortized over the term of such note.

The Company failed to make the first installment payment due in March 2023 which is considered an event of default. Additional money owed to Coventry due to default is considered de minimis as of March 31, 2023.

The total principal amount outstanding under the Coventry Note was \$125,000 and accrued interest of \$5,103 as of March 31, 2023.

On August 10, 2017, the Company entered into a consulting agreement, retroactive to May 16, 2017, with a certain consultant, pursuant to which the consultant agreed to provide certain consulting and business advisory services in exchange for a \$310,000 junior subordinated convertible note. The August 10, 2017 convertible note was fully earned upon signing the consulting agreement and matured on August 10, 2019. The Company accrued \$155,000 related to this expense at June 30, 2017 and recorded the remaining \$155,000 related to this expense in fiscal year 2018. Upon an event of default, principal and accrued interest immediately became due and payable under the note. Additionally, upon an event of default, at the election of the holder, the note would accrue interest at a default interest rate of 18% per annum or the highest rate of interest permitted by law. The consulting agreement had a three-month term and expired on August 16, 2017. An aggregate total of \$578,212 of the August 10, 2017 convertible note was bifurcated with the embedded conversion option recorded as a derivative liability at fair value. During the year ended June 30, 2018, the consultant converted \$140,000 of principal and \$10,764 of interest. During the year ended June 30, 2019, the consultant converted an additional \$161,000 of principal and \$19,418 of interest leaving a principal balance owed of \$9,000 at June 30, 2019. During the year ended June 30, 2020, the consultant converted an additional \$500 of principal and \$5,248 of interest, such that the remaining principal outstanding and accrued interest under the August 10, 2017 convertible note as of June 30, 2020 was \$8,500 and \$22,168, respectively.

On March 15, 2021, the Company entered into a Settlement and Mutual Release Agreement (the "Settlement Agreement") with the consultant, whereby both parties agreed to settle all claims and liabilities under the August 10, 2017 convertible note for a total of \$100,000 in the form of a new convertible note. All other terms of the August 10, 2017 convertible note remained in full force and effect. Both parties agreed that all future penalties under the new note were waived unless the Company failed to authorize and deliver the requested shares of common stock upon conversion. The Company had the right to pay the balance of any remaining amounts due under the new note in cash at any time more than 60 days after March 15, 2021 (or May 30, 2021). Prior to the Settlement Agreement, the Company recorded total liabilities \$56,762 consisting of remaining principal amount of \$8,500, accrued interest of \$23,262 and accrued expenses of \$25,000. Accordingly, the Company recognized loss from settlement of debt of \$43,238 during fiscal year 2021.

The total principal and accrued interest outstanding under the August 10, 2017 convertible note was \$79,000 and \$10,185, respectively, as of June 30, 2022 following conversion of \$1,000 of principal and \$8,000 accrued interest during the year ended June 30, 2022.

The total principal and accrued interest outstanding under the August 10, 2017 Convertible Note was \$0 as of March 31, 2023 following conversion of \$79,000 of principal and \$9,543 accrued interest during the nine months ended March 31, 2023 (see Note 7).

Crown Bridge Securities Purchase Agreements

Effective October 3, 2019, the Company entered into a securities purchase agreement with Crown Bridge, pursuant to which Crown Bridge purchased the Crown Bridge Note from the Company in the aggregate principal amount of \$108,000, such principal and the interest thereon convertible into shares of common stock at the option of Crown Bridge any time after issuance of such note. Pursuant to the terms of such securities purchase agreement, Crown Bridge deducted \$3,000 from the principal payment due under the Crown Bridge Note, at the time of closing, to be applied to its legal expenses, and there was a \$5,000 original issuance discount resulting in \$100,000 net proceeds to the Company. The Company used the net proceeds from the Crown Bridge Note for general working capital purposes. The maturity date of the Crown Bridge Note was October 3, 2020 and is currently past due. The Crown Bridge Note bore interest at a default interest rate of 15% per annum.

Additionally, Crown Bridge had the option to convert all or any amount of the Crown Bridge Note at any time after issuance until the later of such note's maturity date or the date on which the default amount was paid if an event of default occurs, which would be between 110% and 150% of the then outstanding principal amount of the Crown Bridge Note plus any interest accrued, for shares of the common stock at the then-applicable conversion price.

The conversion price of the Crown Bridge Note was equal to 60% (representing a 40% discount) of the lowest closing bid price of the common stock for the ten trading days immediately prior to the delivery of a notice of conversion under such note, including the day upon which such notice was received, subject to 4.99% or 9.99% beneficial ownership limitations. The Crown Bridge Note was treated as stock settled debt under ASC 480 and accordingly the Company recorded a \$72,000 put premium.

The Crown Bridge Note contained certain events of default, upon which principal and accrued interest would become immediately due and payable. In addition, upon an event of default, interest on the outstanding principal accrued at a default interest rate of 15% per annum, or if such rate is usurious or not permitted by current law, then at the highest rate of interest permitted by law. Further, certain events of default may trigger penalty and liquidated damage provisions.

(Unaudited)

The total principal amount outstanding under the Crown Bridge Note was \$65,280 and accrued interest of \$7,232 as of as of June 30, 2020 following conversion of \$42,720 of the principal balance during the year ended June 30, 2020. Accordingly, \$28,480 of the put premium was released in respect of the October 3, 2019 Crown Bridge Note during the year ended June 30, 2020 following partial conversion of the principal balance.

There were 15,000 unissued shares of Common Stock that were considered issuable for accounting purposes during the 1st quarter of fiscal 2021 related to a conversion notice dated and received on September 16, 2020. In November 2020, the Company was notified by Crown Bridge of the cancellation of this conversion notice as a result of the reverse stock split and, as such, the Company reversed the effects of this transaction, thereby increasing the principal balance by \$9,600 and put premium by \$6,400 and a corresponding decrease in equity of \$16,000.

The total principal amount outstanding under the Crown Bridge Note was \$65,280 and accrued interest of \$25,930 as of June 30, 2022.

In August 2022, the SEC filed a complaint against Crown Bridge due to its violation of Section 15(a)(1) of the Exchange Act. Consequently, as of March 31, 2023, the Company reclassified the remaining principal balance of \$65,280 from a convertible note into a loan payable (see Note 5). Additionally, the Company recorded the remaining put premium of \$43,520 into gain on extinguishment of debt during the nine months ended March 31, 2023. Therefore, the total principal amount outstanding under such agreement with Crown Bridge was \$0 after the reclassification of principal to loan payable as of March 31, 2023 (see Note 5).

NOTE 11 – DERIVATIVE FINANCIAL INSTRUMENTS AND FAIR VALUE MEASUREMENTS

Derivative Financial Instruments:

The Company applies the provisions of ASC 815-40, *Contracts in Entity’s Own Equity*, under which convertible instruments and warrants, which contain terms that protect holders from declines in the stock price (reset provisions), may not be exempt from derivative accounting treatment. As a result, warrants and embedded conversion options in convertible debt are recorded as a liability and are revalued at fair value at each reporting date. If the fair value of the warrants exceeds the face value of the related debt, the excess is recorded as change in fair value in operations on the issuance date. The Company had \$121,500 (2 notes) and \$79,000 (1 note) of convertible debt, which were treated as derivative instruments outstanding at March 31, 2023 and June 30, 2022, respectively.

The Company calculates the estimated fair values of the liabilities for derivative instruments using the Binomial Trees Method. The closing price of the Company’s common stock at March 31, 2023, the last trading day of the period ended March 31, 2023, was \$0.0005 per share. The volatility, expected remaining term and risk-free interest rates used to estimate the fair value of derivative liabilities at March 31, 2023 are indicated in the table that follows. The expected term is equal to the remaining term of the warrants or convertible instruments and the risk-free rate is based upon rates for treasury securities with the same term.

Overview

The Company was originally formed in Melbourne, Victoria, Australia on October 15, 2007 as Propanc PTY LTD. On November 23, 2010, Propanc Health Group Corporation was incorporated in the State of Delaware and in January 2011, to reorganize our Company, we acquired all of the outstanding shares of Propanc PTY LTD on a one-for-one basis, whereby Propanc PTY LTD became our wholly-owned subsidiary. Effective April 20, 2017, we changed our name to "Propanc Biopharma, Inc." to better reflect our current stage of operations and development.

We are a development-stage healthcare company that is currently focused on developing new cancer treatments for patients suffering from pancreatic, ovarian and colorectal cancer. Utilizing our scientific and oncology consultants, we have developed a rational, composite formulation of anti-cancer compounds, which together exert a number of effects designed to control or prevent tumors from recurring and spreading through the body. Our lead product candidate, PRP, is a variation upon our novel formulation and involves pro-enzymes, the inactive precursors of enzymes.

Recent Developments

On May 1, 2023, the Company filed a certificate of amendment (the "Certificate of Amendment") to its certificate of incorporation, as amended (the "Certificate of Incorporation"), to effect a one-for-one thousand reverse stock split (the "Reverse Stock Split") of its outstanding shares of common stock, par value \$0.001 per share (the "Common Stock"), effective as of May 1, 2023. In connection with the Reverse Stock Split, the Company submitted an issuer company-related action notification form to the Financial Industry Regulatory Authority, Inc. ("FINRA") notifying FINRA of the Reverse Stock Split. The processing of the effects of the Reverse Stock Split by FINRA on the reported price of the Common Stock on the Pink® Open Market operated by the OTC Markets Group Inc. will occur at the time that the Reverse Stock Split is announced by FINRA on its over-the-counter daily list, which has not occurred as of the date of this Quarterly Report.

Change in Fair Value of Derivative Liabilities

Change in fair value of derivative liabilities were decreased to a loss of \$(238,367) for the three months ended March 31, 2023, as compared to a gain of \$165,365, for the three months ended March 31, 2022. Change in fair value of derivative liabilities were increased to a loss of \$(110,859) for the nine months ended March 31, 2023, as compared to a loss of \$(2,392) for the nine months ended March 31, 2022. This increase in loss during the three and nine months ended March 31, 2023 of approximately \$404,000 and \$108,000, respectively, is primarily attributable to an increase in fair value of the principal amount of convertible notes with bifurcated embedded conversion option derivatives as a result of the decrease in the conversion prices of such notes during the nine months ended March 31, 2023.

Gain from Settlement of Accounts Payable

Gain from settlement of accounts payable was \$17,499 for the nine months ended March 31, 2023, as compared to \$0 for the nine months ended March 31, 2022. On August 16, 2022, the Company and a third-party investor relations consultant agreed to settle an outstanding payable of \$23,050 in exchange for 2,305,000 warrants to purchase Common Stock at \$0.01 per share with an expiry date of August 16, 2025 and fair market value of \$5,551. Accordingly, the fair market value of the shares issued upon conversion was \$369,110, resulting in a loss on extinguishment at the time of conversion of \$234,622 and \$223,288 of derivative fair value was recorded as a gain on extinguishment at the time of conversion, resulting in a net loss of \$11,334.

Additionally, during the nine months ended March 31, 2023, the Company recognized the remaining put premium of \$43,520 related to a convertible note into gain on extinguishment of debt. The holder of such convertible note agreed to surrender all conversion rights in its currently held convertible notes due to violation of Section 15(a)(1) of the Exchange Act, which resulted in a net gain on extinguishment of debt of \$32,186 for the nine months ended March 31, 2023.

Foreign Currency Transaction Gain (Loss)

The change relates to the factors discussed above.

Deemed dividend

The Company recognized the value of the effect of a down round feature related to our Series A warrants when triggered. Upon the occurrence of the triggering event that resulted in a reduction of the strike price, the Company measured the value of the effect of the feature as the difference between the fair value of the warrants without the down round feature or before the strike price reduction and the fair value of the warrants with a strike price corresponding to the reduced strike price upon the down round feature being triggered. Accordingly, the Company recognized deemed dividends of \$0 and \$237,389 during the three months ended March 31, 2023 and 2022, respectively, and a corresponding reduction of income available to common stockholders upon the alternate cashless exercise of these warrants during the three months ended March 31, 2023 and 2022, respectively. We have substantial capital resource requirements and have incurred significant losses since inception. As of March 31, 2023, we had \$93,241 in cash. Such capital requirements are in excess of what we have in available cash and for which we currently have commitments. Therefore, we presently do not have enough available cash to meet our obligations over the next 12 months. If continued funding and capital resources are unavailable at reasonable terms, we may curtail our plan of operations. We will be required to obtain alternative or additional financing from financial institutions, investors or otherwise, in order to maintain and expand our existing operations. Net cash provided by financing activities for the nine months ended March 31, 2023 was \$1,013,719, as compared to \$1,116,500 for the nine months ended March 31, 2022. During the nine months ended March 31, 2023, we received proceeds from the exercise of warrants of \$375,000, proceeds from the sale of shares of our Common Stock of \$24,711, collections of subscription receivables of \$23,758, and net proceeds from the issuance of convertible notes and a note payable of \$590,250.

Net cash provided by financing activities for the nine months ended March 31, 2022 was \$1,116,500. During the nine months ended March 31, 2022, we received proceeds from the exercise of warrants of \$475,000 and net proceeds from the issuance of convertible notes of \$641,500.

Effect of Exchange Rate

The effect of the exchange rate on cash resulted in a \$2,733 positive adjustment to our cash flows in the nine months ended March 31, 2023, as compared to a \$40,436 positive adjustment to our cash flows in the nine months ended March 31, 2022. The reason for the fluctuation is due to the application of currency translation rates throughout our cash flow statement, the volume of transactions within each period and the daily fluctuation in exchange rates.

Critical Accounting Estimates

Below is a discussion of our more subjective accounting estimation processes for purposes of explaining (i) the methodology used in calculating the estimates, (ii) the inherent uncertainties pertaining to such estimates, and (iii) the possible effects of a significant variance in actual experience, from that of the estimate, on our financial condition. Estimates involve numerous assumptions that, if incorrect, could create a material adverse impact on the Company's results of operations and financial condition.

Reference is frequently made herein to the Financial Accounting Standards Board (the “FASB”) Accounting Standards Codification (“ASC”). This is the source of authoritative US GAAP recognized by the FASB to be applied to non-governmental entities. Each ASC reference in this filing is presented with a three-digit number, which represents its Topic. As necessary for explanation and as applicable, an ASC topic may be followed with a two-digit subtopic, a two-digit section or a two-or-three-digit paragraph.

Foreign Currency Translation and Comprehensive Income (Loss): The Company’s wholly-owned subsidiary’s functional currency is the AUD. For financial reporting purposes, the Australian Dollar (“AUD”) has been translated into USD as the Company’s reporting currency. Assets and liabilities are translated at the exchange rate in effect at the balance sheet date. Revenues and expenses are translated at the average rate of exchange prevailing during the reporting period. Equity transactions are translated at each historical transaction date spot rate. Translation adjustments arising from the use of different exchange rates from period to period are included as a component of stockholders’ equity (deficit) as “accumulated other comprehensive income (loss).” Gains and losses resulting from foreign currency transactions are included in the statement of operations and comprehensive loss as other income (expense). Effective fiscal year 2021, the Company determined that intercompany loans will not be repaid in the foreseeable future and thus, per ASC 830-20-35-3, gains and losses from measuring the intercompany balances are recorded within cumulative translation adjustment, a component of other comprehensive income.

Accounting for Income Taxes: We are governed by Australian income tax laws and United States income tax laws, which are administered by the Australian Taxation Office and the United States Internal Revenue Service, respectively. We follow ASC 740, “*Accounting for Income Taxes*,” which requires an asset and liability approach to financial accounting and reporting for income taxes. Deferred income tax assets and liabilities are computed annually for temporary differences between the financial statements and tax bases of assets and liabilities that will result in taxable or deductible amounts in the future based on enacted tax laws and rates applicable to the periods in which the differences are expected to affect taxable income. Valuation allowances are established when necessary, to reduce deferred tax assets to the amount expected to be realized. Income tax expense is the tax payable or refundable for the period plus or minus the change during the period in deferred tax assets and liabilities.

The Company adopted provisions of ASC 740, Sections 25 through 60, “*Accounting for Uncertainty in Income Taxes*.” These sections provide detailed guidance for the financial statement recognition, measurement and disclosure of uncertain tax positions recognized in the financial statements. Tax positions must meet a “more-likely-than-not” recognition threshold at the effective date to be recognized upon the adoption of ASC 740 and in subsequent periods.

Accounting for Stock Based Compensation: We record stock-based compensation in accordance with ASC 718, “*Stock Compensation*” and Staff Accounting Bulletin No. 107 issued by the SEC in March 2005 regarding its interpretation of ASC 718. ASC 718 requires the fair value of all stock-based employee compensation awarded to employees to be recorded as an expense over the related requisite service period. The statement also requires the recognition of compensation expense for the fair value of any unvested stock option awards outstanding at the date of adoption. We value any employee or non-employee stock-based compensation at fair value using the Black-Scholes Option Pricing Model.

We account for non-employee share-based awards in accordance with the measurement and recognition criteria of ASC 718.

Derivative Instruments: ASC 815, “*Derivatives and Hedging*,” establishes accounting and reporting standards for derivative instruments and for hedging activities by requiring that all derivatives be recognized in the balance sheet and measured at fair value. Gains or losses resulting from changes in the fair value of derivatives are recognized in earnings. On the date of conversion, or payoff, of debt, we record the fair value of the conversion shares, remove the fair value of the related derivative liability, remove any discounts and record a net gain or loss on debt extinguishment.

Convertible Notes with Variable Conversion Options: We have entered into convertible notes, some of which contain variable conversion options, whereby the outstanding principal and accrued interest may be converted, by the holder, into shares of Common Stock at or around a fixed discount to the price of the Common Stock at the time of conversion. We treat these convertible notes as stock settled debt under ASC 480 and measure the fair value of the notes at the time of issuance, which is the result of the share price discount at the time of conversion, and record the put premium as accretion to interest expense.

Research and Development Tax Credits: We may apply for research and development tax concessions with the Australian Taxation Office on an annual basis. Although the amount is possible to estimate at year end, the Australian Taxation Office may reject or materially alter the claim amount. Accordingly, we do not recognize the benefit of the claim amount until cash receipt since collectability is not certain until such time. The tax concession is a refundable credit. If we have net income then we can receive the credit which reduces its income tax liability. If we have net losses, then we may still receive a cash payment for the credit, however, our net operating loss carry forwards are reduced by the gross equivalent loss that would produce the credit amount when the income tax rate is applied to that gross amount. The concession is recognized as an income tax benefit, in operations, upon receipt.

Recent Accounting Pronouncements

Please see section captioned “Recent Accounting Pronouncements” in Note 1 to our unaudited condensed consolidated financial statements included in this Quarterly Report for a discussion of recently issued and adopted accounting pronouncements.

Going Concern Qualification

We did not generate any revenue for the nine months ended March 31, 2023 and 2022 and have incurred significant losses and cash used in operations, and such losses and use of cash are expected to continue. Our independent registered public accounting firm has included a “Going Concern Qualification” in its audit report for each of the fiscal years ended June 30, 2022 and 2021. In addition, we have negative working capital and convertible debt that is past maturity that we are currently negotiating with lenders in order to amend the maturity dates. The foregoing raises substantial doubt about our ability to continue as a going concern for a period of 12 months from the issue date of this report. Our ability to continue as a going concern is dependent on our ability to execute our strategy and on our ability to raise additional funds and/or to consummate a public offering. Management is currently seeking additional funds, primarily through the issuance of equity and/or debt securities for cash to operate our business. No assurance can be given that any future financing will be available or, if available, that it will be on terms that are satisfactory to us. Even if we are able to obtain additional financing, it may contain undue restrictions on our operations, in the case of debt financing or cause substantial dilution for our stockholders, in case of equity and/or convertible debt financing. The consolidated financial statements do not include any adjustments that might result from the outcome of this uncertainty. The “Going Concern Qualification” might make it substantially more difficult to raise capital.

Off-Balance Sheet Arrangements

We do not have any off-balance sheet arrangements that have or are reasonably likely to have a current or future effect on our financial condition, changes in financial condition, revenues or expenses, results of operations, liquidity, capital expenditures or capital resources.

Item 3. Quantitative and Qualitative Disclosures About Market Risk.

Not applicable to smaller reporting companies.

Item 4. Controls and Procedures.

Evaluation of Disclosure Controls and Procedures

Our management is responsible for establishing and maintaining disclosure controls and procedures (as such term is defined in Rule 13a-15(e) under the Exchange Act) that are designed to reasonably ensure that information required to be disclosed in our reports under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the rules and forms of the SEC, and that such information is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure based closely on the definition of “disclosure controls and procedures” in Rule 15d-15(e) under the Exchange Act. In designing and evaluating the disclosure controls and procedures, our management recognized that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives, and management necessarily was required to apply its judgment in evaluating the cost-benefit relationship of possible controls and procedures.

At the end of the period covered by this Quarterly Report, we conducted an evaluation (the “Evaluation”), under the supervision and with the participation of our Chief Executive Officer and Chief Financial Officer of the effectiveness of the design and operation of our disclosure controls and procedures. Based upon the foregoing, our Chief Executive Officer and Chief Financial Officer concluded that, as of March 31, 2023, the disclosure controls and procedures of our Company were not effective to ensure that the information required to be disclosed in our Exchange Act reports was recorded, processed, summarized and reported on a timely basis due to the material weaknesses in financial reporting as discussed below.

Material Weaknesses and Corrective Actions

The framework used by management in making that assessment was the criteria set forth in the document entitled “2013 Internal Control - Integrated Framework” issued by the Committee of Sponsoring Organizations of the Treadway Commission, (“COSO”). In connection with the audits of our financial statements for the fiscal years ended June 30, 2022 and 2021, we identified certain deficiencies relating to our internal control over financial reporting that constitute a material weakness under standards established by the Public Company Accounting Oversight Board (the “PCAOB”). A material weakness is a deficiency, or a combination of deficiencies, within the meaning of PCAOB Audit Standard No. 5, in internal control over financial reporting, such that there is a reasonable possibility that a material misstatement of our annual or interim financial statements will not be prevented or detected on a timely basis.

The following material weaknesses in our internal control over financial reporting continued to exist at March 31, 2023:

- we do not have written documentation of our internal control policies and procedures. Written documentation of key internal controls over financial reporting is a requirement of Section 404 of the Sarbanes-Oxley Act of 2002 (the “Sarbanes-Oxley Act”);
- we do not have sufficient segregation of duties within accounting functions, which is a basic internal control. Due to our limited size and early-stage nature of operations, segregation of all conflicting duties may not always be possible and may not be economically feasible; however, to the extent possible, the initiation of transactions, the custody of assets and the recording of transactions should be performed by separate individuals;
- we lack an audit committee of our board of directors; and
- we have insufficient monitoring and review controls over the financial reporting closing process, including the lack of individuals with current knowledge of US GAAP.

We outsource certain of the functions that would normally be performed by a principal financial officer to assist us in implementing the necessary financial controls over the financial reporting and the utilization of internal management and staff to effectuate these controls.

We believe that these material weaknesses primarily relate, in part, to our lack of sufficient staff with appropriate training in US GAAP and SEC rules and regulations with respect to financial reporting functions, and the lack of robust accounting systems, as well as the lack of sufficient resources to hire such staff and implement these accounting systems.

Subject to raising sufficient additional capital, we plan to take a number of actions in the future to correct these material weaknesses including, but not limited to, establishing an audit committee of our board of directors comprising at least two independent directors, adding experienced accounting and financial personnel and retaining third-party consultants to review our internal controls and recommend improvements. We will need to take additional measures to fully mitigate these issues, and the measures we have taken, and expect to take, to improve our internal controls may not be sufficient to (1) address the issues identified, (2) ensure that our internal controls are effective or (3) ensure that the identified material weakness or other material weaknesses will not result in a material misstatement of our annual or interim financial statements. In addition, other material weaknesses may be identified in the future. If we are unable to correct deficiencies in internal controls in a timely manner, our ability to record, process, summarize and report financial information accurately and within the time periods specified in the rules and forms of the SEC will be adversely affected. This failure could negatively affect the market price and trading liquidity of our common stock, cause investors to lose confidence in our reported financial information, subject us to civil and criminal investigations and penalties, and generally materially and adversely impact our business and financial condition.

Limitations on Effectiveness of Controls and Procedures

In designing and evaluating the disclosure controls and procedures and internal control over financial reporting, management recognizes that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives. In addition, the design of disclosure controls and procedures and internal control over financial reporting must reflect the fact that there are resource constraints and that management is required to apply judgment in evaluating the benefits of possible controls and procedures relative to their costs.

Changes in Internal Controls over Financial Reporting

There were no changes in our internal controls over financial reporting that occurred during the quarter ended March 31, 2023 that have materially affected, or are reasonably likely to materially affect, our internal controls over financial reporting.

PART II — OTHER INFORMATION

Item 1. Legal Proceedings.

We are not currently involved in any litigation that we believe could have a material adverse effect on our financial condition or results of operations. There is no action, suit, or proceeding by any court, public board, government agency, self-regulatory organization or body pending or, to the knowledge of the executive officers of our Company or our subsidiary, threatened against or affecting our Company, our common stock, our subsidiary or of our companies or our subsidiary's officers or directors in their capacities as such, in which an adverse decision could have a material adverse effect.

Item 1A. Risk Factors.

We are not required to provide this information as we are a smaller reporting company.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds.

From January 5, 2023 through March 30, 2023, the Company issued an aggregate of 1,375,598,285 shares of Common Stock at an average contractual conversion price of \$0.0002 per share as a result of the conversion of principal of \$290,000, and accrued interest of \$17,985 underlying certain outstanding convertible notes converted during such period.

Except as otherwise noted, the securities in the transactions described above were sold in reliance on the exemption from registration provided in Section 4(a)(2) of the Securities Act for transactions not involving any public offering. All certificates evidencing the shares sold bore a restrictive legend. No underwriter participated in the offer and sale of these securities, and no commission or other remuneration was paid or given directly or indirectly in connection therewith. The proceeds from these sales were used for general corporate purposes.

Item 3. Defaults Upon Senior Securities.

As of March 31, 2023, we were in default under a certain loan payable issued to certain lender on October 3, 2019 for failure to pay an aggregate of \$65,280 and \$38,281 of principal and accrued interest, respectively, as of March 31, 2023, subsequent to their maturity date. Additionally, we were in default under a certain convertible note with principal amount of \$120,000 which was issued to a lender on November 3, 2022 for failure to pay the first installment payment due in March 2023 which is considered an event of default. We are currently in discussions with such noteholder to extend such maturity date. See "Note 5 – Loans" to our unaudited condensed consolidated financial statements in Part I of this Quarterly Report for additional information.

Item 4. Mine Safety Disclosures.

Not Applicable.
